

**Pl. note the following info regarding the final exam.**

**Date and Time:** Friday March 10; Exam starts at 6 PM CST

**Format:** 2-Part exam:

Part 1: Multiple Choice (MC).

Part 2: One programming question (Format similar to midterm).

**Part 1:** The exact number of MC questions or the duration of the exam is not determined yet. I expect to have 10-15 MC questions, and perhaps as many as 20. The number of questions will not exceed 20.

The number of questions and the level of difficulty will determine the duration of the exam. My plan is select questions so that we can keep this part (Part 1) under 45 minutes.

I plan to post an announcement with further details, including the exact number of MC questions, the duration for Part 1 and any other relevant info on the day of the exam.

And, I plan to use a format similar to tests **some** firms use for interviews so that the exam may serve as a further learning opportunity to prepare for job interviews.

**Medium:** This test is to be taken online, from the exam room assigned to you only. You CANNOT take this test from anywhere else (unless you're authorized to use a remote exam center with in-person proctoring). Canvas is used to administer the exam.

(I plan to post a "practice test" for the benefit of those of you are not familiar with taking a test in Canvas. Expect an announcement on this over the weekend or early part of next week. The practice test will not include any "real" questions, but you can use it to familiarize with the testing mechanism used in Canvas.)

Once you are done Part 1, be sure to submit your exam using the submit button at the very bottom of the page. Needless to say, a student can take Part 1 of the exam only once.

**I will post an announcement on the course (canvas) site with the link to the exam just before exam start-time.**

**Instructions:**

1. Resources you may use: Read MidtermInstructions.pdf, item 9.
2. You cannot use any resource on the Internet. You cannot use any other external resources either.

**Part 2: Programming Question (similar to midterm questions)**

Most likely it will be one question, which will have multiple parts. Use one project/solution to answer all parts.

The duration of the exam depends on the level of difficulty of the exam.

I plan to keep this part under 90 minutes.

I will to post an announcement with further details, including the duration for Part 2 and any other relevant info on the day of the exam.

All instructions detailed in MidtermInstructions.pdf still apply. Only change is you will be using a different link to submit the exam (e.g. "Final Part-2")
